## THE 2019 HPS SALARY SURVEY

## Stephen L. Bump

Introduction

The 2019 Health Physics Society (HPS) survey data was collected by having health physicists (HPs) submit their responses to survey questions on a webbased data entry form. As was done in previous years, data was collected in conjunction with a salary survey of certified health physicists (CHPs).

The CHP salary survey results are reported separately in the CHP News.

The survey was also available in hard-copy form for those who preferred to fax or mail their responses.

## Data Analysis

The salary ranges marked by HPs on the completed survey forms were rounded to the midpoints of those ranges before statistical analyses were performed. For example, if an HP marked the salary range $\$ 50,000$ to $\$ 52,499$, their salary was rounded to the midpoint value of $\$ 51,250$.

Responses from HPs who were either part-time or retired were not analyzed, since the data did not appear to allow meaningful comparisons to be made.

To minimize skewing the results, data from survey respondents were excluded from the data analysis if they indicated that they earned more than $\$ 375,000$ per year.

HP salaries by region are also presented in this report.

## Data Presentation

In an effort to make the results of the survey interesting and useful, HPs were subcategorized in several ways by education, field of practice, primary job
responsibility, years of experience, and combinations of these subcategories.

Readers are advised that for statistical validity, results were given only if there were 10 or more HPs within that subcategory. Data presented for one subcategory of HPs may not be possible for another subcategory. There were fewer respondents in 2019 as compared to 2018.

The subcategories in the tables may also change from year to year, depending on the number of responses received. Every effort was made to keep the subcategories consistent with previous surveys, but if there were fewer than 10 HPs , the results were not given.

## Tables and Figures

Tables show results for fulltime HPs who received health, vacation, and retirement benefits from their primary employer unless otherwise noted.

Histograms of the data shown in Table 1- All HPs, and Table 2 - Master's Health Physics are included as Figures 1 and 2 respectively.

All of the following tables are for full-time HPs with health, vacation, and retirement benefits unless otherwise indicated.
