Scientific Committee

Stephanie E. Combs, MD

Jürgen Debus, MD PhD

Marco Durante, PhD

Wolfgang Enghardt, Ph D

Thomas Haberer, PhD

Oliver Jaekel, PhD

Marc Münter, MD

PTCOG 48 will offer the opportunity to share high-end technology and innovative radiotherapy combining medical, physical and biological expertise. The campus environment and the scientific atmosphere of the University of Heidelberg will stimulate multidisciplinary discussion and networking. The Heidelberg Ion Therapy (HIT) facility will be open to the community, which offers particle treatment in 2 horizontal rooms and one large carbon ion and proton gantry for over 1300 patients per year.

Key Aspects

» Novel Clinical Concepts in Radiation Oncology » Radiation Biology of Particle Beams » Molecular Responses and Mechanisms » Radiochemotherapy » Biological Treatment Modification » Innovative Applications of Particle Beams » Dosimetry and Quality Assurance
