HPS Instrumentation Kit

All teachers will receive an HPS Instrumentation Kit before the workshop.

If multiple teachers are attending from the same school/same county, a lead teacher can be designated. Would you be willing to be a lead teacher?

Yes

No

A lead teacher's responsibility is to coordinate the attendance of other local teachers from the same school or the same county and to accept the shipment of the instrumentation kit. When the instrumentation kit is received, please open and assemble the instrument to check operational status. Instructions included. If there is a problem with the kit, please contact Ken Krieger (kvkrieger@netzero.net) to request a replacement. The kit will become the property of the receiving school and does not need to be returned to the Health Physics Society.

Alternatively, save and send this form to lkmorris288@gmail.com

Note: The information collected in this registration form will be used only by the Health Physics Society.
